

## **INSTRUCTIONS TO CHANGE THE GULLET PLATE:**

Pull back the flap inside the gullet after undoing the Velcro strip.

Undo Phillips head screws situated just behind the Saddle D rings under both skirts.

Pull both panels down off the Synthetic tree points exposing the fitted metal gullet bar.

Undo both screws and replace it with the size gullet bar required.

Refit panel to the tree points and carefully line up the thread socket that is imbedded in the panel with the top screw situated behind the D ring and tighten.
